TALHA SHAFIQUE

Motivated Mobile Developer with hands-on experience in Jetpack Compose, XML UI design, Flutter, Dart and MVVM architecture. Skilled in building responsive, optimized, and scalable mobile applications. Adept at applying modern Android development practices with strong problem-solving and debugging capabilities.

Technical Skills

Mobile Application Develpment:

- Jetpack Compose, Flutter, and XML UI Design
- Flutter & Dart Development
- MVVM Architecture, Clean Architecture, and OOP
- Room Database, Volley, Firebase, Riverpod, Supabase
- Kotlin Programming
- Android Studio, Git, and Version Control
- API Integration with Retrofit 2

Education

Bachelor Of Science in Information Technology | BS Hons. (IT)
Arid Agriculture University, Rawalpindi
Final Year Project: FoodiesHub - Restaurant Ordering App

Intermediate Of Computer Science | (I.C.S)
District Public School & College, Okara

Matriculation | (Matric)
District Public School & College, Okara

Projects

Trucking Tracker App (Jetpack Compose - Based)

- Kotlin Jetpack Compose logistics app for booking shipments, generating quotes, and real-time tracking using MVVM, Retrofit, and Google Maps.

Work History

Designation (Software Engineer) – 01/2026 to Present
Company Name: Creamerz Soft, Lahore, Pakistan

- Develop and maintain cross-platform mobile applications using **Flutter & Dart**, ensuring scalable architecture, clean code practices, and smooth performance across Android and iOS platforms.
- Integrate **Supabase services** including authentication, real-time database, storage, and APIs to build secure, data-driven, and high-performance mobile solutions.
- Collaborate with designers and backend teams to implement modern UI/UX, optimize app performance, and deliver production-ready applications aligned with business requirements.

Designation (Software Engineer) – 08/2024 to 01/2026
Company Name: Innovex IT Solutions, Lahore, Pakistan

- Developed and maintained Android and cross-platform mobile applications using **Jetpack Compose, Flutter & Dart**, implementing modern architectures (MVVM & Clean Architecture) for scalable and high-performance solutions.
- Integrated REST APIs, Firebase, Room Database, and advanced state management (Riverpod) while collaborating with teams to optimize app performance and deliver modern UI/UX experiences.
- Collaborated with cross-functional teams to optimize app performance, improve UI/UX design, and deliver high-quality mobile solutions aligned with industry best practices.

Internee (Mobile App Developer) – 02/2024 to 08/2024
Company Name: Punjab Information Technology Board (PITB) Lahore, Pakistan

- Assisted in developing Android and Flutter applications using **Jetpack Compose, XML, and Flutter**, focusing on responsive UI design and performance optimization.
- Implemented Firebase Authentication, REST APIs, Room Database, and modern state management while following clean architecture principles under senior mentorship.
- Worked closely with senior developers to follow clean architecture principles, lifecycle management, and coding standards for maintainable mobile applications.
